Experience

E*TRADE Financial Mobile Product Intern

Summer 2019 - New York, NY

Worked in an Agile environment to develop initial use cases for a Google Assistant app action using aspects of conversation design and design thinking. Collaborated with the design team to re-engineer the trade ticket and pre-login mobile experience. Analyzed data and created visualizations of KPIs to identify mobile data trends for the company's Monthly Business Reviews

Bikelane Solutions Product Intern

Summer 2018 - New York, NY

Worked on a team of 5 to create a product from ideation to execution for small retail/restaurant businesses to generate more revenue. Gathered and analyzed market research data to identify their pain points, discover opportunities in the market space, and develop a strategy for the new product. Created a wireframe of the mobile application and pitched it to outsourced developers.
